

PR TOOL

Application Setup:

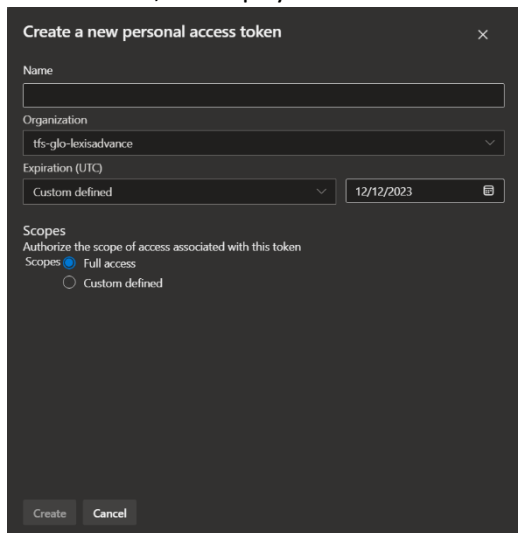

- Create a Personal Access Token (PAT) through which a onetime process.
- Use this “https://tfs-glo-lexisadvance.visualstudio.com” link and click on top right  icon.
- Select Personal Access Tokens

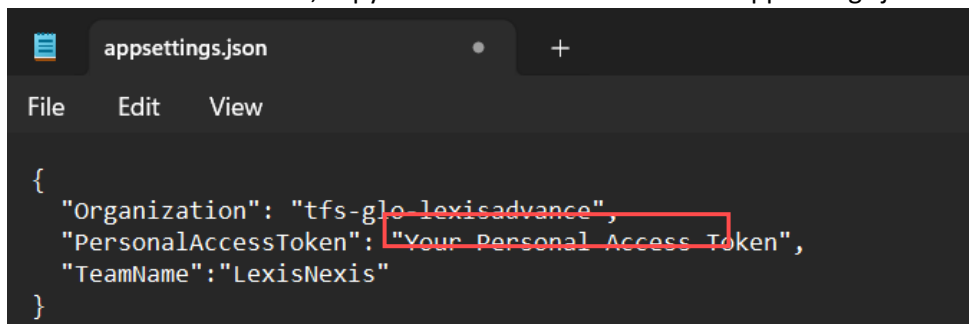

- Click on “New Token”.

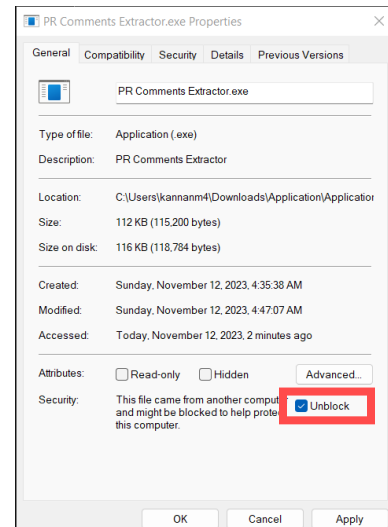

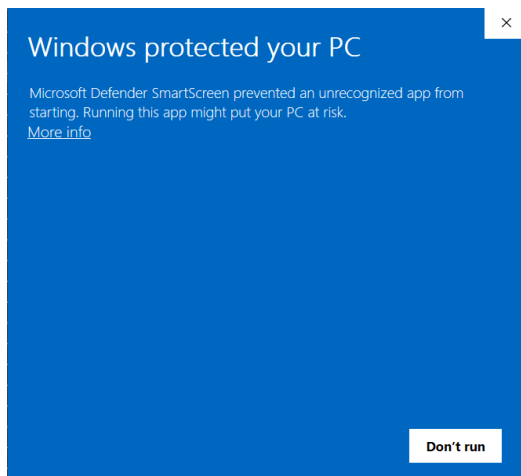

- Give a name, the expiry date of token and then click on “Create”.

- Once the token is created, copy the token and store it in the “appsettings.json” file inside the application folder.

- Open “PR Comments Extractor.exe” from application folder.

- If you see the above screen, right click on the “PR comments Extrcator.exe” and go to properties. Make sure the checkbox in security is checked as shown and click on apply.

Pull Request Report Generator

Project: Apps Repository: Abe.LA-App

Team report Associate ID: From: 2022-01-01 To: 2023-11-12

Functionalities:

1. Team PR Generation:

One-click generation of a team's recent PR info and comments for easy tracking.

2. Individual PR Generation:

Ability to generate PR info and comments for individual associates using their legal ID.

3. Group Reports:

Report generation for a group of associates by specifying legal IDs with comma separation.

Example: "johnMo, Morphe, Kannanr5, porchbm" generates a report for 4 individual associates.

4. Flexible Report Generation:

Option to generate reports based on either project or repository criteria.

5. Time Frame and Branch Reports:

Generation of desired and historical reports based on specified time frames and target branches.

6. Export to Excel:

Option to export generated reports to an Excel sheet.
